

BARCODE

Model No. 8030

DESIGN DR. PATRIC DRAENERT

The Barcode Table is a dining table and also a conference table. It can be recycled by 100 % due to its basic materials stone and steel. The concept of sustainability is the basis of this design as the stones from the production process are used as resource. Every Barcode Table is unique. The table top can be supplied in many different combinations. Naturally, the individual selection of the stone types is limited and availability must be checked by enquiry.

AVAILABLE IN THE FOLLOWING MATERIAL VARIANTS:

Stone

Model type	Side walls	Size	Top	Top	Top	Top
	natural stone 8 cm	W - L - H approx. in cm	frame box 8 cm Ebony & Ivory	frame box 8 cm Gobi	frame box 8 cm Steel	frame box 8 cm Magic

8030 dining table natural stone Barcode	100 x 200 x 74
	100 x 250 x 74

Note:

The Barcode is manufactured from stone stripes in different widths.
 For the barcode pattern, different stone types either from soft stones or from hard stones are combined.
 Hard stones and soft stones may not be combined together.
 Only residues from the production process are used and no new complete stone slabs will be cut.
 Due to this fact, not the stone types may be defined, but only the color worlds.
 Each Barcode table is unique.
 The individual selection of stone types is naturally limited and the availability must be verified on request.

Defined color worlds:

Ebony & Ivory	light and dark colors from soft stones
Gobi	beige and brown colors from soft stones
Steel	grey and green colors from hard stone
Magic	various black and darker shades from hard stones

Further color worlds on request.
